HD Series Filter Sock FS810

- **HD Highflow Fabric**
- **Custom Sizes Available**
- **Double Stitched Seams**

Our HD series filter sock is designed to protect storm water openings from harmful silt and other debris contaminating the storm water inlet. It is the perfect filter for side inlet storm water drains. The filter sock is designed for ease of use and maximum flexibility. A variety of fill materials such as sand, gravel and pea stone can be used. It is available in a variety of sizes for almost any application and can also be ordered in custom configurations to suit any specifications the job may call for.
