Designed to meet the DOT silt fence with washer reinforcement regulations in NJ— our heavy duty Silt Fence includes a draw cord and metal washer reinforcement. Utilizing premium hardwood posts metal reinforcement washers, the Silt Fence allows water to pass through the fabric, while costly suspended soil particles are trapped to settle to the ground. This restricts the loss of costly jobsite material, keeps our roads and highways free of mud, and protects our lakes and streams from harmful silt build-up. Wide crown 1" staples, air driven into solid heavy duty hardwood posts with metal washer reinforcement at each post combine for superior strength and durability.
